ATM TMK-SHARE SOLUTION

All banks who acquire cards using ATM face the below challenge with regards to deploying the ATM TMK while deploying ATMs

- Generate the initial TMK components for the ATM PIN pad.
 - Some use the manual process of creating the components directly from the console commands of the HSM
- Document / Copy the components by the respective managers.
 - Some get the respective managers to come to the console and copy the components into a paper / pre defined format
- Distribute / Transport them to the relevant ATM and install.
 - The respective managers / personnel has to take that paper with the written down component (securely) to the ATM and do the installation.
 - Sometimes transportation costs alone are making the installation of an ATM a burden to the bank.

Evolving. Transforming. Empowering.
DMS DIGITAL TECHNOLOGIES PTE LTD

THE DMS ATM TMK-SHARE SOLUTION ENABLES THE BANK TO FURTHER STREAMLINE AND OPTIMIZE THE ATM/CRM TMK COMPONENT LOADING PROCESS BY

- Generating the TMK components using an application reduces the manual interaction with the HSMs.
- Print TMK components into PIN mailers using a printer thus eliminate manual work needed to copy TMK components. The PIN mailer can print
 - The Location/Branch ID
 - Manager/Duty Officer name responsible for the component
 - Address
 - ATM/CDM number
- Distribute the TMK component PIN mailers to the respective managers using the courier or bank mail service without having the responsible personnel to come to the central location to copy and carry the document with them.
- Print the Encrypted Component into a laser printer to populate into the ATM Switch.

Technologies Used

- Microsoft Windows
- Java
- H2

Ideal for

- Banks deploying ATMs and CRMs.
- Central ATM switch operators deploying ATMs and CRMs.
- Third party ATM switch operators deploying ATMs and CRMs.
